

NOTICE OF PUBLIC WORKSHOP

DEPARTMENT OF ENVIRONMENTAL PROTECTION BUREAU OF AIR QUALITY

CHAPTER 117 SOURCE SURVEILLANCE

DATE: June 4, 2008
TIME: 9:00 a.m. - Noon
PLACE: Civic Center
Augusta, Maine

The Department is holding a public workshop on a staff working draft of Chapter 117 Source Surveillance and welcomes your comments and suggestions. This regulation specifies which air emission sources are required to operate continuous emission monitoring systems (CEMS), and details the performance specifications, quality assurance requirements and quality control procedures for these systems, and associated record keeping and reporting requirements.

After the public workshop, staff will finalize a draft rule and begin the formal rulemaking process, including a public hearing with an opportunity for interested parties to testify at the hearing or submit written comments to the Department.

A staff working draft detailing the suggested amendments will be available by May 9, 2008 at www.maine.gov/dep/air/regulations/specialntc.htm

For more information, contact Carolyn Wheeler at 287-2437.

If you plan on attending this workshop, please register with Boris Golubow at 287-2437.
